questions	S8 T10	S9 T5	S2 T12	S4 T5	S1 T12	S3 T18	S7 T13	S6 T13	S14 T10	S15 T11	S16 T19	S9 T11	S17 T19

- T5 Identify where the windscreen washer reservoir is and tell me how you would check the windscreen washer level. *Identify the reservoir (under the bonnet, bottom right) and do a visual check for the level.*
- T10 Tell me how you would check the brakes are working before you start a journey. *Explain that the brakes should not feel spongy or slack, brakes can be tested as you set off and the car should not pull to one side.*
- T11 Tell me how you would check the headlights and tail lights are working. *Explain you would operate the switch (round switch to the right of the steering wheel, 2 clicks to the right) then walk round the vehicle.*
- T12 Tell me where you would find the information for the recommended tyre pressures and how should they be checked. *Refer to the manufacturers guide, use a reliable pressure gauge, check and adjust tyre pressures when tyres are cold, don't forget the spare tyre or to refit the valve caps.*
- T13 Tell me how you would check the tyres to ensure they have sufficient tread depth and that their general condition is safe. *There should be a minimum of 1.6mm tread depth across the central $\frac{3}{4}$ breadth and the entire outer circumference, make sure there are no cuts or bulges.*
- T18 Tell me how you make sure your head restraint is correctly adjusted so it provides you with the best protection in the event of a crash. *Make sure the rigid part is as close to the head as is comfortable and is at least as high as eye level.*
- T19 Tell me how you would know if there was a problem with your anti lock braking system. *A warning light would appear and then stay on.*

- S1 Open the bonnet, identify where you would check the engine oil level and how would you know there is sufficient oil. *Identify the dipstick (yellow hook in centre of engine block), wipe clean, replace and check against min/max level.*
- S2 Show me how you would check the power steering is working. *When the engine is off the steering feels really heavy! When the engine is started the steering should become light.*
- S3 Open the bonnet, identify where you would check the engine coolant level. *Identify min/max levels on the header tank (left hand side of the engine).*
- S4 Show me how you would check the handbrake for excessive wear, make sure you keep safe control of the vehicle. *Apply the footbrake, take off handbrake then re apply making sure it secures itself and is not at the end of its working travel.*
- S6 Show me how you would check the horn is working (off road only). *Push the centre of the steering wheel.*
- S7 Open the bonnet, identify where the hydraulic brake fluid reservoir is and how would you check the level. *Identify the reservoir (top left, above the engine coolant) check against min/max levels.*
- S8 Show me how you would check the indicators are working. *Operate the hazard warning switch, walk round the vehicle and check the lights.*
- S9 Show me how you would check the brake lights are working. *Ancillary power to the car, push the brake pedal and ask the examiner to check the lights. If you were alone you could reverse the car to somewhere where you could get a reflection.*
- S14 Show me how you would clean the windscreen using the washers and wipers. *Ancillary power to the car, push and hold the button on the end of the right stick.*
- S15 Show me how you would set the demister controls to clear all windows effectively. *Push the MAX button in the central column, this turns the heater and fan on full and turns on the heated front and rear screens, push again to turn off.*
- S16 Show me how to operate the rear fog lights and explain when you would need them. *Turn headlights on, push the small button to the right. Rear fog lights should be used when visibility is reduced to less than 100m.*
- S17 Show me how to switch your headlights from dipped beam to full beam, and explain how you would know it's on main beam when inside the car. *Turn on headlights, pull indicator switch towards you, a blue warning light will illuminate.*
